

AL-AHLEIA SWITCHGEAR CO.

STATE OF KUWAIT

BATTERY CHARGERS

INTRODUCTION

Al-Ahleia battery charger panels are designed and manufactured to suit the load requirements of each specification. Battery charges of rated D.C. voltage 24V, 30V, 50V, 110V, and 220V can be supplied.

FEATURES

- Nickel Cadmium or lead acid batteries as required.
- Permanent connection of battery to charger.
- Automatic high rate / low rate declining current charging or constant voltage charging.
- Natural cooling of components.
- Ideally suited for switchgear auxiliary supply.
- Complete input / output isolation.
- DC load normally fed from mains supply.
- Wall mounted or floor mounted design.
- Test facility for battery charge level (optional).
- Replaceable miniature fuses for A.C. and D.C. are provided on front panels for ease of maintenance (optional).

50VDC, 45A
